

February 18, 1920.

Professor J.H.Ehlers,
Ann Arbor, Mich.

My dear Sir:

Your letter of December 11 addressed to my predecessor, Prof.D.L.Crawford, has been referred to me. You speak of plant exchanges but do not say what wort of material you have to offer; I have just finished making exchanges that have practically exhausted our duplicate material, except for one set of about 630 sheets of Southern California plants, and another of perhaps 150. We have also some sets of Nicaragua plants, about 150 sheets, and two sets of about 100 sheets of economic plants largely tropical. Now I am trying to build up as large a collection as possible of western material and you have anything from Colorado west or southwest, I should be interested in it.

I can sell you the Nicaragua or economic plants or both at ten cents a sheet.

Very truly yours,
